

**A STEP CHANGE
IN WORKING
AT HEIGHT SAFETY**

**INTELLIGENT
ANCHOR POINT
HARNES ON™**

CONNECTS TO STANDARD CARABINER

CREATE MORE SAFETY FOR THE OPERATOR

The IPAF Global Safety Report, 2021 highlights that falls from height continues to be a leading cause of fatal accidents during Mobile Elevated Working Platform (MEWP) operation.

To mitigate against this risk, Harness ON™ intelligent anchor point stops the MEWP's operation until the operator attaches their harness carabiner. Harness ON is permanently shackled to the MEWP's anchor point and wired electronically into the MEWP's function controls.

Once the carabiner is clipped onto Harness ON's inductive ring, an electronic signal tells the MEWP that operation is now safe and allows function until the carabiner is finally unclipped.

Harness ON is a simple solution and doesn't impact on how an operator works. You simply click, connect, and operate to ensure safer working at height.

FEATURES & BENEFITS

- Simple and easy to use
- Compatible with all sizes of carabiner clips
- No need for a specialised harness
- Compatible with all machines
- Meets EU and ANSI safety standards
- The MEWP will only operate when Harness ON has been connected
- IAPA award winner 2023 for Innovative Technology Price

REF 168TA2671

MEWP ONLY OPERATES WHEN OPERATOR CLIPS ON HARNESS ON™

SIMPLE OPERATION, INCREASES COMPLIANCE AND REDUCES RISK

“Simple & straightforward. It's easy to understand the concept, how it works and how it will save lives”

Peter Douglas (MD & CEO of IPAF)
