

To ensure that aerial work platforms can be operated safely at all times, the correct tyres must be fitted. For boom lifts, the tyres have to be sturdy and therefore foam-filled tyres offer the perfect solution. As replacing four tyres can cost you an arm and a leg, you're probably looking for a more

economic answer.

TVH now offers an ideal solution. Since the spring of 2018, TVH has its own state-of-the-art cabin to fill tyres with foam. This means that no other parties are involved in the filling process anymore, resulting in a considerably lower price for you.

Why choose TVH as your partner for foam-filled tyres:

- Delivery within 24 to 48 hours for all common wheel assemblies available on stock.
- · You only pay for the **exact amount of foam** that was needed to fill the tyres.
- \cdot We can reuse your rims and mount the new tyres onto them.
- **High-quality foam** thanks to our computer-controlled filling system that ensures that the liquids are mixed in a 50:50 ratio.
- · A quality check is done before and after each filling.

Not sure what tyre you need for your boom lift? Send us the type and serial number of your machine and we will find out for you!
