

FOAM-FILLED TYRES KEEP YOUR MEWPS UP AND RUNNING

The smartest way to leak-proof your tyres

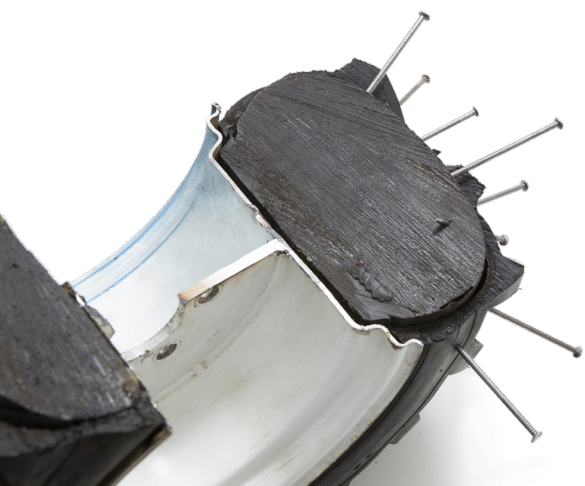

MEWP tyres need to be puncture-proof, sturdy and reliable to ensure absolute safety. Foam-filled tyres are an excellent option. These tyres are filled with an anti-puncture foam and offer a greater stability than before thanks to the added weight of the foam.

Have your tyres filled in our own, dedicated tyre-filling cabin at TVH. We can offer you either a tyre, rim and foam-filling as a complete package (complete wheel assembly) or simply fill your original pneumatic tyres.

Why do you need foam-filled tyres?

- **Certainty:** avoid punctured tyres due to sharp objects such as debris, nails ...
- **Safety:** prevent dangerous situations caused by a sudden pressure loss of your tyres
- **Efficiency:** reduce downtime and increase the productivity of your machines
- **Compliant:** obligated for stability inspections of MEWPs

How do you benefit from the TVH foam-filling service?

- **Quality:** high-quality foam thanks to our computer-controlled filling system that ensures a constant quality
- **Peace of mind:** a quality check of the mixture is carried out before and after each filling
- **Fast service:** delivery within 24 to 48 hours for all common wheel assemblies available from stock
- **Economic:** you only pay for the exact amount of foam that was needed to fill the tyres, resulting in a lower price
- **Ecologic:** we can reuse your original rims and mount the new tyres onto them

Not sure which tyres you need? Send us the type and serial number of your machine and we will find out for you. Our product range also includes all spare parts for your machines: engine parts, filters, chains, batteries ...
