

# **ELECTRIC SYSTEM DESIGN**

Electrification is a hot topic today and directly related to stricter environmental regulations. TVH can be your partner in this growing demand. TVH's design team for electrical systems can assist you in the electrification process and specialises in providing electrical and electronic products and technical support during the development or upgrade of your application.

Using its technical expertise in the field, TVH can assist in the design of the electrical system from design to prototyping and production. The team works directly with manufacturers to deliver customised motor and controller solutions that meet the system requirements.
